Technologies/Skills

Languages: JavaScript | Typescript | HTML | CSS | Sass/SCSS | SQL | Ruby | JSON

Frameworks & Libraries: React | Node.js | Express.js | Tailwind CSS | Material UI | Axios | Redux

Database & Industry Tools: PostgreSQL | Sequelize | Git | GitHub | bcrypt | AWS | Postman

Professional Experience

Software Engineer

Jan. 2023 – Present

Devmountain (Student) | Lehi, Utah

- Developed a fullstack application called Tour de Globe: A Country Flashcard App with the PERN stack where users learn the capitals and flags of countries around the world in a fun and interactive way.
- Developed 10 React components that contributed to the interface and functionality, including user authentication, data saving capabilities, and real-time data retrieval from a RESTful API.
- Integrated a Node.js and Express.js backend to optimize data saving and retrieval from a PostgreSQL database while leveraging Sequelize for database interactions.
- Utilized the PERN stack to create a fullstack application, Circuits, that helps racing novices or enthusiasts learn interesting facts and test their knowledge about some of the most popular racetracks in the world.
- Utilized React and Node.js to build an efficient and mobile-friendly website that seamlessly delivered requested data by making Axios requests to a PostgreSQL database.
- Created an engaging UI featuring racetrack quizzes and an image carousel by utilizing CSS and React's diverse features.

Development Counselor

Apr. 2022 – Present

Development Counseling Services | Provo, UT

- Developed relationships with 50+ clients to assist in reaching their career and professional goals by providing career and mental health counseling, community outreach, and vocational rehabilitation.
- Collaborated with a cross-functional team to understand the social and emotional factors related to the client's employment challenges and increase employee attendance by 85%.
- Conducted phone and in-person screening and interviewing to identify client's eligibility for the program and personal strengths and needs.
- Utilized data from vocational assessment tools to help clients identify personal strengths and career paths.

Behavior Support Technician

Aug. 2019 – Apr. 2021

Murray City School District | Murray, UT

- Coached students one-on-one to teach positive replacement behaviors to reduce severe behavioral issues by 75-100%.
- Partnered with a cross-functional team of 5-10 professionals, including social workers, psychologists, special education educators and district behavior specialists to identify student support and development strategies.

Software Engineering Projects

Mental Health Skills App

Developing a mental health software app utilizing Typescript, React, Tailwind CSS, Node.js, and PostgreSQL where users can embrace their mental health as an integral part of one's overall well-being by learning skills including emotional regulation, gratitude, and breathing.

Press Zero

Developing an app utilizing React, Node.js, and PostgreSQL that helps users find customer service numbers that bypasses the frustrating prerecorded agents and connects you to a real person.

Education

Web Development Program

2023

Devmountain | Lehi, UT

Master of Social Work

2022

Brigham Young University | Provo, UT

Bachelor of Science in Psychology

2019

Utah Valley University | Orem, UT
